

W 160: Miniature Series for Optimum Solutions

W 160 are especially well-suited for use in the branches:

- Electronic components and circuit board manufacturing
- Packaging and printing industry
- Assembly and handling technology
- Special mechanical engineering
- Conveyor technology.

The ranges:

- Through-beam photoelectric switch WS/WE 160: 14 m, 3 slotted masks as accessory
- Photoelectric reflex switch WL 160: 6 m (PL 80 A), with polarizing filter
- Photoelectric proximity switch WT 160: energetic: scanning distance to 900 mm (90 % reflectance), for standard scanning jobs. With focussed optics: Scanning distance 8 to 55 mm, background suppression, small light spot, high sensitivity. With divergent optics (opening angle approx. 40°): scanning distance to 105 mm. Ideal for transparent objects.

	Photoelectric proximity switches
	Photoelectric reflex switches
	Through-beam photoelectric switches
	Photoelectric fiber-optic switches (scanner)
	Photoelectric fiber-optic switches (through-beam)

S Simple handling, large scanning distances, reduced number of types thanks to integrated L.ON/D.ON switches are system focal points.

All W 160 optics variants are available in two housing models with axial or 90° light emission.

The WLL 160 photoelectric switch for fiber-optic cables with switching point setting, manually per potentiometer or automatically per Teach-In at the push of a button, rounds out the W 160 series. Plastic fiber-optic cables of the LL 3 series in approx. 50 different options are available as accessories.

SICK

	Scanning distance 4... 55 mm
Photoelectric proximity switch	

- Horizontal and vertical models
- Focussed scanner with background suppression and great sensitivity
- Contamination control with green LED indicator and contamination control output

Housing shape	Horizontal													
	Vertical													
Scanning distance, typ. max.	4 ... 55 mm ¹⁾													
Operating scanning distance	8 ... 50 mm ¹⁾													
Background suppression	From approx. 100 mm													
Adjustable sensitivity	Potentiometer, 2 rotations w. scaling 270°													
Light source ²⁾ , light type		LED, red light												
Light spot diameter	Approx. 3 mm at 25 mm distance													
Transmitter dispersion angle	Focussed, focus 25 mm													
Supply voltage V_S		DC 10 ... 30 V ³⁾												
Residual ripple ⁴⁾	$\pm 10\%$													
Current consumption ⁵⁾	≤ 25 mA													
Switching outputs		PNP, open collector: Q												
		NPN, open collector: Q												
Output current I_A max.	100 mA													
Light receiver, switching type	Light/dark switching per rotary switch													
Response time ⁶⁾ /Max. switching frequ. ⁷⁾	≤ 0.5 ms / 1000/s													
Connection type: connection cable		PVC, 2 m ⁸⁾ ; 3 x 0.2 mm ² , $\varnothing$ 4.2 mm												
plug		3 pin, M8												
plug		4 pin, M8												
VDE protection class ⁹⁾	$\square$													
Protection circuits ¹⁰⁾	A, B, C, D													
Enclosure rating		IP 67												
Ambient temperature		Operation $-25 \dots +55$ °C												
		Storage $-40 \dots +70$ °C												
Weight		With connection cable approx. 60 g												
		With plug approx. 20 g												
Housing material		Housing: PBT; optics: PMMA												

- 1) Scanned material with 90 % reflectance (with reference to standard white according to DIN 5033)
- 2) Average service life 100,000 h at $T_U = +25$ °C

- 3) Limit values
- 4) May not exceed or fall short of V_S tolerances
- 5) Without load

- 6) Signal operating time with ohmic load
- 7) With light/dark ratio 1:1
- 8) Do not bend connection cable below 0 °C
- 9) Rated voltage DC 50 V

- 10) A = V_S connections reverse-polarity protected
- B = Inputs and outputs reverse-polarity protected
- C = Interference pulse suppression
- D = Outputs overload and short-circuit protected

Opening angle of fiber-optic cables	Approx. 65°											
Supply voltage V_S	DC 10 ... 30 V ³⁾											
Residual ripple ⁴⁾	± 10 %											
Current consumption ⁵⁾	≤ 30 mA											
Switching outputs	PNP, open collector: Q											
	NPN, open collector: Q											
Output current I _A max.	100 mA											
Light receiver, switching type	Light/dark switching p.slide switch											
Response time ⁶⁾ / Max. switching frequ. ⁷⁾	≤ 0.35 ms / 1500/s											
VMA contamination message	100 mA, static											
Test input TE⁸⁾	Transmitter off; PNP: TE after + V											
	Transmitter off; NPN: TE after 0 V											
Time delay T_{OFF} (switch-off delay)	Selectable, per slide switch											
Time range	Adjust, 0 ... 100 ms; potentiometer 270°											
Connection type: connection cable	PVC, 2m ⁹⁾ ; 5 x 0.2 mm ² , ø 4.2 mm											
plug	4 pin, M8											
VDE protection class¹⁰⁾	□											
Protection circuits ¹¹⁾	A, B, C, D											
Enclosure rating	IP 66											
Ambient temperature	Operation -25 ... +55 °C											
	Storage -40 ... +70 °C											
Weight	With connection cable approx. 80 g											
	With plug approx. 30 g											
Housing material	Housing: ABS											

- 1) Scanned material with 90 % reflectance (with reference to standard white according to DIN 5033)
 2) Average service life 100,000 h at T_U = + 25 °C
 3) Limit values

- 4) May not exceed or fall short of V_S tolerances
 5) Without load
 6) Signal operating time with ohmic load
 7) With light/dark ratio 1:1
 8) TE not with plug model

- 9) Do not bend connection cable below 0 °C
 10) Rated voltage DC 50 V
 11) A = V_S connections reverse-polarity protected

- B = Inputs and outputs reverse-polarity protected
 C = Interference pulse suppression
 D = Outputs overload and short-circuit protected

Specifications		WLL 160T-	F132	F430	E132	E430						
Suitable fiber-optic cables	LL 3 plastic fiber-optic cables											
Scanning distances	Dependent on used fiber-optic cable type											
Oper. range, through-beam system	0 ... 500 mm (with adapter tips 0 ... 2 m)											
Oper. scanning distance, scanner system	0 ... 70 mm ¹⁾											
Adjustable sensitivity	Automatic, per TEACH-IN key or "MAX" mode											
Mode selector switch "MAX" position	Max. range, set permanently											
"SET" position	TEACH-IN key activated											
"RUN" position	TEACH-IN key inactive											
TEACH-IN	Equipment in sensor mode											
manual	Per push button (only active if mode switch is in "SET" position)											
Extern TEACH-IN	Only active, if mode switch is in "RUN" position											
	PNP: control wire + V											
	NPN: control wire 0 V											
Light source²⁾, light type	LED, visible red light											
Light spot diameter	Dependent on the range											
Opening angle of fiber-optic cables	Approx. 65°											
Supply voltage V_S	DC 10 ... 24 V											
Residual ripple ³⁾	≤ 5 V _{SS}											
Current consumption ⁴⁾	≤ 50 mA											
Switching outputs	PNP, open collector: Q											
	NPN, open collector: Q											
Output current I _A max.	100 mA											
Light receiver, switching type	Light/dark switching per slide switch											
Response time ⁵⁾ /Max. switching freq. ⁶⁾												
Dependent on selected operating mode!												
"Mode"-Selector switch in Pos. "MAX"												
or Selector switch "Response time"												
in "NORM" position:	≤ 0.6 ms/830/s, selectable											
Selector switch "Resp. time" in Pos. "HI":	≤ 0.3 ms/1660/s ⁷⁾											
VMA contamination message	30 mA, one shot, pulse length 40 ms											
Time delay T _{OFF} (switch-off delay)	40 ms fixed, selectable, per slide switch											
Connection type: connection cable	PVC, 2m ⁸⁾ ; 5 x 0.18 mm ² , ø 4.0 mm											
plug	4 pin, M8											
VDE protection class⁹⁾	□											
Protection circuits ¹⁰⁾	A, B, C, D											
Enclosure rating	IP 66											
Ambient temperature	Operation – 25 ... + 55 °C											
	Storage – 40 ... + 70 °C											
Weight	With connection cable approx. 80 g											
	With plug approx. 30 g											
Housing material	Housing: ABS											

- 1) Scanned material with 90% reflectance (with reference to standard white according to DIN 5033)
- 2) Average service life 100.000 h at T_U = + 25 °C

- 3) May not exceed or fall short of V_S tolerances
- 4) Without load
- 5) Signal operating period with ohmic load
- 6) With light/dark ratio 1:1

- 7) Scanning distance reduction approx. 30 %
- 8) Do not bend connection cable below 0° C
- 9) Withstand voltage DC 50 V
- 10) A = V_S connections reverse-polarity protected

- B = Inputs and outputs reverse-polarity protected
- C = Interference pulse suppression
- D = Outputs overload and short-circuit protected

WLL 160T-F132	6 010 650
WLL 160T-F430	6 010 651
WLL 160T-E132	6 010 648
WLL 160T-E430	6 010 649

1. Precise sensitivity setting (per 2x push of button); WLL 160T

TEACH-IN steps

The TEACH-IN button is pressed twice. This operating mode provides **high sensitivity** and is ideal for **very precise switching points**. The WLL 160T optimizes the switching threshold and hysteresis per μ -processor automatically and stores them in EEPROM. No special experience in precise alignment of optoelectronic components necessary.

Applications:
Through-beam system; even thin or transparent objects are detected.
Detection system; strong background interference, small or dark scanning objects, simple marks with contrast differences.

2. Simple sensitivity setting (per 1x push of button); WLL 160T

TEACH-IN steps

The TEACH-IN button is only pressed once. This operating mode provides **simple handling**. The WLL 160T system detects existing background interference automatically. The WLL20160T optimizes the switching threshold and stores it in EEPROM. No special experience in setting the sensitivity of optoelectronic components necessary.

Applications:
Through-beam system; even small or partially transparent parts, which do not interrupt the light path completely, are detected. Detection system; background interference considered.

3. Max. scanning range, fixed setting; WLL 160T

4. Moving objects; precise sensitivity adjustment (per 2x push of button); WLL 160T

Functions WLL 160T TEACH-IN

Response time/switching speed

NORM: 830 Hz; max. system scanning distance.

HI: 1660 Hz, system scanning distance 70 %. Select before TEACH-IN!

Switch-off delay T_{OFF}

For switching output Q. Optional connection, 40 ms fixed. To ensure that your control can also detect shorter events.

Selector switch switching output Q

L.ON: light switching
D.ON: dark switching optionally in PNP or NPN.

Connection technique

Optionally M8 plug, 4 pin (no alarm output) or 5-wire connecting cable.

Alarm output

- **TEACH-IN mode:** signals TEACH-IN error.
- **Sensor mode (RUN):** signals insufficient signal reserve, e.g., due to soiling or misalignment (not with plug version M8 – 4 pin).

WLL 160T Assembly technology

Assembly and disassembly on tophat profile rail mounting by pulling the locking device.

Mounting technique

Simple snap-on on tophat profile rails. Mounting bracket supplied with equipment.

μ-Processor technique with EEPROM

Permanent storage of taught-in switching threshold and hysteresis, even when there are longer interruptions of voltage.

TEACH-IN button

Sensitivity setting at the push of a button. No special knowledge of phototelectric switches required. Only active if MODE selector switch is set to SET pos. (manipulation protection).

TEACH-IN mode selector switch

Separate from operating mode functions, and consequently simple and easy-to-understand handling; no double functions.

■ **MAX:** Maximum scanning range set permanently. Caution: switching speed independent of operating mode selection; switching speed always 830 Hz.

■ **SET:** WLL 160T in manual TEACH-IN mode. Optimum switching point setting at the simple push of a button (1 or 2 times).

■ **RUN:** optionally

– **TEACH-IN manual:** The taught-in switching threshold and hysteresis are stored in EEPROM.

The WLL 160 T operates in sensor mode after 2 s.

– **External TEACH-IN (ET):**

Optimum system adjustment using external control signal. Ideal if the WLL 160T is not accessible or part changes are often aligned automatically.

Fiber-optic cable lock

Press down bracket: fiber-optic cables are locked. Press the lug: fiber-optic cables are released.

Fiber-optic cable attachment

- Transmitter fiber-optic cable
 - Receiver fiber-optic cable
- Suitable fiber-optic cable: **plastic fiber-optic cables of the LL3 series** (see the description of the LL3 variants).

BUZZER

For acoustic support. Short tone after TEACH-IN = O.K.

Long tone after TEACH-IN = error or application not suitable.

LED display red, green

■ **TEACH-IN mode:**

Signalization TEACH-IN process.
Permanently blinking: TEACH-IN error.
Permanently lit: TEACH-IN o.K.

■ **Sensor operation:**

LED red: switching threshold exceeded
LED green: received signal > 1.1 or < 0.9

External TEACH-IN signal ET

LL 3

Plastic Fiber-Optic Cables – Flexible in Every Sense of the Word

Their great variety is another factor: a total of approximately 50 different models of the LL 3 provide optimum alternatives for almost all applications from optical, mechanical and chemical standpoints. Various tip adapters make additional applications possible. The LL 3 fiber-optic cables and the corresponding photoelectric fiber-optic switches from SICK create a strong team. They are especially useful in the semi-conductor, electronics assembly, packaging, handling and assembly systems, special mechanical engineering and precision engineering.

	Fiber-optic cable through-beam systems
	Fiber-optic cable scanner systems

No assembly space – not even for miniature photoelectric cables, chemical corrosion or increased ambient temperatures are often decisive reasons for the use of LL 3 plastic fiber-optic cables. In connection with the photoelectric switch series WLL 160(T), LL 3 cables enable reliable object detection even under difficult conditions.

Their multifaceted flexibility says a lot about the LL 3: small bending radii, simple shortening to the required length and different terminal sleeves make it possible to connect and lay them easily.

LL 3 options:

- Standard fiber-optic cables
- Large scanning ranges
- Tip adapters
- Small terminal sleeves
- Highly flexible with the smallest bending radii
- Integrated 90° offset
- Temperature resistant to 180 °C
- Teflon coating against aggressive environments
- Coaxial structure
- Pliable terminal sleeves
- 10 m length
- Fiber-optic lines
- Level switch ...

Characteristics

- Highly flexible
- Small bending radii
- Fiber-optic cables can be shortened easily with cutting device (supplied with equipment)
- Operation temperature $-40 \dots +70 \text{ }^{\circ}\text{C}$
Special models to $180 \text{ }^{\circ}\text{C}$

Selection table: sensors, fiber-optic cables, scanning distances

LL 3-DR04	5 308 081

Material: core: PMMA; coating: PE;
Sleeve: 1.4305 (German material no.)
Corrosion-resistant stainless steel

Ordering information

Type	Order no.
LL 3-DR06	5 308 082

Material: core: PMMA; coating: PE;
Sleeve: 1.4305 (German material no.)
Corrosion-resistant stainless steel

Dimensional drawings for LL 3 fiber optic cables – scanner systems

Ordering information

Type	Order no.
LL 3-DB02	5 308 083

Material: core: PMMA; coating: PE;
Sleeve: 1.4305 (German material no.)
Corrosion-resistant stainless steel

- 1) Flexible terminal sleeve, do not bend in this area (10 mm), bending radius R 10
- 2) Transmitter (marked blue)
- 3) Receiver

Ordering information

Type	Order no.
LL 3-DM03	5 308 084

Material: core: PMMA; coating: PE;
Sleeve: 1.4305 (German material no.)
Corrosion-resistant stainless steel

- 1) Flexible terminal sleeve, do not bend in this area (10 mm), bending radius R 10

Ordering information

Type	Order no.
LL 3-DT02	5 308 085

Material: core: PMMA; coating: PE;
Sleeve: 1.4305 (German material no.)
Corrosion-resistant stainless steel

- 1) Terminal sleeve inflexible

Ordering information

Type	Order no.
LL 3-DT04	5 308 086

Material: core: PMMA; coating: PE; Sleeve:
CuZn brass nickel-plated

- 1) Terminal sleeve inflexible

Ordering information

Type	Order no.

Ordering information

Type	Order no.
LL 3-TM03	5 308 070

Material: core: PMMA; coating: PE; Sleeve:
1.4305 (German material no.) Corrosion-resistant stainless steel

Dimensional drawings and ordering information

■ Pin assignment according to EN 50044

SENSICK circular screwing system M 8, 4 pin, enclosure rating IP 67

M 8 cable receptacle, 4 pin, straight

Type	Order no.
DOS-0804-G	6 009 974

M 8 cable receptacle, 4 pin, angled

Type	Order no.
DOS-0804-W	6 009 975

M 8 cable receptacle, 4 pin, straight

Cable Ø 5 mm, 4 x 0.25 mm², PVC coating

Type	Order no.	Cable length
DOL-0804-G02M	6 009 870	2 m
DOL-0804-G05M	6 009 872	5 m
DOL-0804-G10M	6 010 754	10 m

M 8 cable receptacle, 4 pin, angled

Cable Ø 5 mm, 4 x 0.25 mm², PVC coating

Type	Order no.	Cable length
DOL-0804-W02M	6 009 871	2 m
DOL-0804-W05M	6 009 873	5 m
DOL-0804-W10M	6 010 755	10 m

1) Minimum bending radius with dynamic use
 $R_{min} = 20 \times \text{cable diameter}$

Mounting bracket for W 160

Type	Order no.
BEF-W 160	5 305 197

Supplied with WS/WE 160, WL 160 and WT 160.

Mounting bracket for WLL 160

Type	Order no.
BEF-WLL 160	5 305 400

Supplied with WLL 160 and WLL 160T.

Reflector

Type	Order no.
P 250	5 304 812

Supplied with WL 160.

Slotted masks for WS/WE 160

Slot width: 1.0 mm*/0.5 mm, 1.0 mm, 2.0 mm

Type	Order no.
BL-160-10*	5 305 196
BL-160-SK	5 310 718

2 pieces supplied with equipment.

Cutting device for fiber-optic cables

Ordering information

Type	Order no.
FC	5 304 141

The cutting device is supplied with the LL 3. Follow the operating instructions in the packaging.

- 1 Template for bending radius R 10 mm, for terminal sleeve $\varnothing$ 1.5 mm and $\varnothing$ 2.5 mm
- 2 Bending radius R 5 mm

◀ WLL 160 in the fiber-optic cable model detects the thinnest wires without problems in the production of resistances.

▼ Presence check of closures: Lid detection with WT 160 photoelectric proximity switch and clock-pulse with WS/WE 160 through-beam photoelectric switches.

▲ The WT 160 miniature photoelectric proximity switch is used in film processing and for controlling belt tension.

► Closure and label check with WT 160 photoelectric proximity switch.
